

What is the scope of the project?

The purpose of this project is to:

- Reduce roadway congestion on the corridor
- Eliminate roadway deficiencies associated with a lack of shoulders and turn lanes in order to reduce the accident rate on S.R. 108
- Enhance opportunities for bicycle, pedestrian and transit facilities, consistent with local and regional land use and transportation plans

Proposed improvements include:

- Widen roadway to five lanes
- Center turn lanes
- Center medians
- Widened and/or new shoulders
- Sidewalks and dedicated at-grade pedestrian crossings
- Bike lanes
- Intersection improvements
